# The Facts: Kentucky as an Example

There Is More Than One Opioid Crisis. To better tackle the epidemic, Kentucky needed to know which drugs were causing lethal overdoses. By Kathryn Casteel Published Jan. 17, 2018. <https://fivethirtyeight.com/features/there-is-more-than-one-opioid-crisis/>. Accessed January 18, 2018.

## The most common drugs found in Kentucky's overdose victims

Based on an analysis of 1,471 drug overdose deaths in 2016

Individual drugs		Two-drug combinations		Three-drug combinations	
DRUG	SHARE	DRUGS	SHARE	DRUGS	SHARE
Morphine	45.4%	Heroin, morphine	24.3%	Heroin, morphine, codeine	16.6%
Fentanyl	37.0	Fentanyl, morphine	23.7	Heroin, morphine, fentanyl	11.6
Gabapentin	32.6	Codeine, morphine	20.0	Morphine, codeine, fentanyl	9.3
Alprazolam	25.5	Heroin, codeine	16.6	Heroin, morphine, THC-COOH	7.9
THC-COOH	24.9	Gabapentin, morphine	14.2	Heroin, codeine, fentanyl	7.6
Heroin	24.7	Morphine, THC-COOH	12.8	Fentanyl, morphine, THC-COOH	7.3
Codeine	20.7	Alprazolam, morphine	12.6	Alprazolam, heroin, morphine	7.3
Ethanol	18.4	Methamphetamine, amphetamine	12.0	Gabapentin, heroin, morphine	7.1
Oxycodone	17.2	Heroin, fentanyl	11.7	Gabapentin, fentanyl, morphine	6.8
Methamphetamine	17.1	Oxycodone, oxymorphone	11.5	Alprazolam, codeine, morphine	6.6

In cases in which multiple drugs are detected, every individual drug — as well as every two- and three-drug combination — is counted separately.

## Here's how Colorado is combating the prescription opioid and heroin epidemic

Colorado is exploring opioid prescription limits, prescriber report cards and new treatment options.

By **JOHN FRANK** | jfrank@denverpost.com | The Denver Post

PUBLISHED: November 5, 2017 at 12:01 am | UPDATED: November 6, 2017 at 11:02 am

The nation's drug epidemic kills someone in Colorado about every 9 hours and 36 minutes, a fact that rings like a siren for state leaders who are combating the leading driver: prescription and illicit opioids.

The most alarming trend is the rate of heroin deaths. The number of overdoses caused by heroin, an opioid, continues to skyrocket, contributing to 228 deaths last year, compared with just 79 five years earlier, according to state figures.

**PainWeek.**

## The Facts

## THE DENVER POST

- “The state tracks opioid prescriptions, but doctors aren't required to check the database”
- “The vast majority of states require clinicians to check the Prescription Drug Monitoring Program (PDMP) database before writing most opioid prescriptions”

## THE DENVER POST

A crackdown on overprescribing isn't enough — drug treatment options remain a challenge.

According to policymakers, Colorado's initial efforts to restrict opioid prescriptions may have an unintended effect: pushing addicts to opioids such as heroin or fentanyl. The trend is spotlighting the limited treatment options for drug users who want help.

## The Facts

## THE DENVER POST

### Doctors will soon get opioid prescription “report cards.”

To educate doctors about the dangers of overprescribing opioids, Colorado is testing a relatively new idea that is showing early results — prescriber report cards.

The reports, also known as scorecards, will give clinicians a summary of their prescriber history and how they rank with their peers in the same specialty in terms of dosage, duration and type of drug.

## The Clinical Implications

Now, across Colorado and the rest of the nation, these policies intended to address opioid abuse have unexpectedly harmed patients who depend on the drugs to treat chronic conditions, pain specialists and patient advocates say. The policies are supposed to offer guidance — helpful advice to doctors to be cautious in prescribing more than a certain amount of opioids to any one patient.

Officials at the Colorado Department of Regulatory Agencies are looking at revising the guidelines. The Colorado Consortium for Prescription Drug Abuse Prevention, a group of medical and drug experts, is also working on ideas to protect pain patients while cracking down on opioid abuse.

## CDC Vital Signs July 2015

# The Clinical Implications

### Recommendations that impact us:

- Screen and identify high-risk individuals
- Treat people with substance abuse disorders
- Naloxone

**PainWeek**

## Responding to the Heroin Epidemic

### PREVENT People From Starting Heroin

**Reduce prescription opioid painkiller abuse.**  
Improve opioid painkiller prescribing practices and identify high-risk individuals early.

### REDUCE Heroin Addiction

**Ensure access to Medication-Assisted Treatment (MAT).**  
Treat people addicted to heroin or prescription opioid painkillers with MAT which combines the use of medications (methadone, buprenorphine, or naltrexone) with counseling and behavioral therapies.

### REVERSE Heroin Overdose

**Expand the use of naloxone.**  
Use naloxone, a life-saving drug that can reverse the effects of an opioid overdose when administered in time.

## The Facts – The “F” Word

Centers for Disease Control and Prevention  
National Center for Injury Prevention and Control

Prescription Behavior Surveillance System (PBSS)

ISSUE BRIEF

### Fentanyl

- Originally developed as an anesthetic
  - One of the safest opioids
  - High LD50/ED50 ratio
- More potent than morphine
  - 100 times more potent
- More potent than heroin
  - 20-50 times more potent
- NOT NEW

**PainWeek**

## FENTANYL: Overdoses On The Rise

Fentanyl is a synthetic opioid approved for treating severe pain, such as advanced cancer pain. Illicitly manufactured fentanyl is the main driver of recent increases in synthetic opioid deaths.

**50-100x MORE POTENT THAN MORPHINE**

Ohio Drug Submissions Testing Positive for Illicitly Manufactured Fentanyl

### SYNTHETIC OPIOID DEATHS ACROSS THE U.S.

### ILICITLY MANUFACTURED FENTANYL

Although prescription rates have fallen, overdoses associated with fentanyl have risen dramatically, contributing to a sharp spike in synthetic opioid deaths.

## Case 1

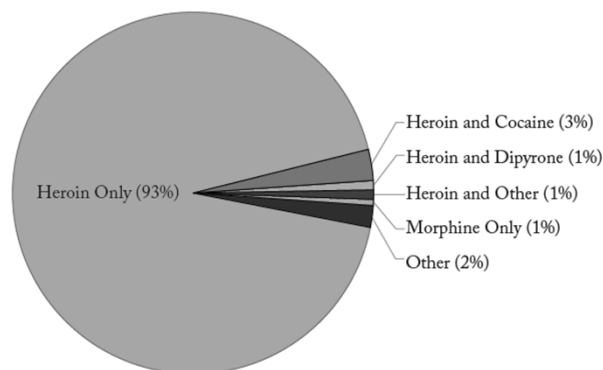

- 42-year-old Hispanic male
  - Addicted to heroin
  - Comes to the same street corner every day to buy heroin
    - First dose usually free
  - He's actually buying heroin laced with fentanyl
  - "It's a new epidemic" he says
  - "If you catch a bag of pure fentanyl, that Narcan ain't bringing you back"
  - "I just watched my friend die from fentanyl"

**PainWeek**

## Heroin and Fentanyl: A "Perfect" Pair

- The overwhelming majority of the time fentanyl is paired with heroin
- To get a better "high"
- "Better" economic profile

Note: Percentages may not sum to total because of rounding.

## The Facts

WORLD | ASIA | CHINA NEWS

### The Chinese Connection Fueling America's Fentanyl Crisis

A vast network beginning in China feeds fentanyl, a deadly synthetic opioid, to the U.S., Mexico and Canada

By JEANNE WHALEN and BRIAN SPEGELE  
Updated June 23, 2016 1:44 a.m. ET

#### Criminal Chemistry

Traffickers manufacturing fentanyl often purchase the key ingredient from China, which doesn't regulate its sale. Here's how the chemical building blocks become a highly profitable street drug.

The key ingredient is NPP, 25 grams of which can be bought from China for about \$87\*

NPP can be combined with about \$720 of other chemicals<sup>†</sup> to produce fentanyl.

The resulting 25 grams of fentanyl cost about \$810 to produce...

...and are equivalent to up to \$800,000 of pills on the black market.

\*Average current price from Chinese suppliers  
Sources: NES Inc.; Drug Enforcement Administration; Calgary Police

†Prices from U.S. suppliers

THE WALL STREET JOURNAL.

**PainWeek**

- Fentanyl can be manufactured anywhere
  - Synthetic
- N-Phenethyl-4-piperidinone is NPP
  - Intermediate precursor to fentanyl
- It is cheap
- It is not going anywhere

## Terminology

## The Facts

- A very small amount of fentanyl is potentially fatal
- This applies to **licit or illicit** fentanyl
  - Illicitly manufactured fentanyl is likely no more dangerous than legally manufactured fentanyl
- Fentanyl label:
  - FENTANYL CITRATE SHOULD BE ADMINISTERED ONLY BY PERSONS SPECIFICALLY TRAINED IN THE USE OF INTRAVENOUS ANESTHETICS AND MANAGEMENT OF THE RESPIRATORY EFFECTS OF POTENT OPIOIDS
  - AN OPIOID ANTAGONIST, RESUSCITATIVE AND INTUBATION EQUIPMENT AND OXYGEN SHOULD BE READILY AVAILABLE
  - Fentanyl may cause muscle rigidity, particularly involving the muscles of respiration
  - DIMINISHED SENSITIVITY TO CO<sub>2</sub> STIMULATION MAY PERSIST LONGER THAN DEPRESSION OF RESPIRATORY RATE

**PainWeek**

# A Fentanyl Crisis

**The Washington Post**

**Fentanyl linked to thousands of urban overdose deaths**

In two dozen of the nation's largest cities, fentanyl is becoming a major part of the national opioid crisis

By Nicole Lewis, Emma Ockerman, Joel Achenbach and Wesley Lowery

Aug. 15, 2017

# The Implications

**In 24 of the nation's largest cities fatal fentanyl-related overdoses increased 600% from 2014-2016**

**Painweek.**

# Increasing Fentanyl Overdoses The Facts

## Different Types of Fentanyl and Presentations

- Different formulations and varying potencies:

- Fentanyl
- Analogs
  - Acetyl fentanyl
  - Ocfentanil
  - Carfentanyl
  - Remifentanyl
  - Alfentanyl
  - Sufentanyl
  - Furanylfentanyl

- Presentations

- Powder
- Counterfeit pills
- Etc

**Pain**WEEK.

## Carfentanyl

- Synthetic
- Large animal anesthetic
- 100 times more potent than fentanyl
- 10,000 times more potent than morphine
- Airborne/skin exposure often fatal
  - 2012 Moscow Theater Hostage Crisis

**Pain**WEEK.

## The Facts

Members of the Royal Canadian Mounted Police go through a decontamination procedure in Vancouver, British Columbia, in June 2016 after intercepting a package containing approximately one kilogram (2.2 pounds) of the opioid carfentanil imported from China. (Royal Canadian Mounted Police via AP/AP)

## The Facts

---

- Fentanyl in the wrong hands is deadly
- Potentially contributing significantly to overdose/fatal overdose risk
- Analogs not often tested for in routine toxicology testing
- Naloxone is a bridge to survival but not a final solution
  - Re-narcotization from fentanyl is common
  - CO<sub>2</sub> will persist
  - Diminished hypoxic drive may persist

**PainWeek.**

## Who and What is Our Responsibility?

---

We Are Involved Like it or Not

## Does the United States Own the Problem??

- We are not alone
- This *is* a global issue
- In 2015, approximately ¼ billion people abused/misused drugs
  - ~29.5 million (0.6% of global adult population) engaged in problematic use/suffered from substance use disorder
- 70% of the global burden of disease caused by drug use disorders attributable to opioid use

**PainWeek.**

## However...

Drug-related deaths remain highest in the US

**PainWeek.**

## The Facts

# Clinical Considerations and Implications

- The “New Math” for determining opioid risk/benefit analysis

## Final Thoughts

- We must consider the parallel “opioid” crises that exist today
  - Our role in these problems
- Heroin and fentanyl are not going anywhere
- Remember the “New Math”
- Naloxone is likely something to keep top of mind
- Avoidance of “risky” situations is critical
- Strongly consider and document appropriate candidates for fentanyl-based therapies
- Everyone is looking at us as an integral part of solving this “other” opioid crisis
- Everyone is looking to us to be a part of the solution

## Final Thoughts

---

But... Let's not make patients "pay" for these crises

***"Cure sometimes, treat often,  
comfort always."***
