May 4, 2019

Raleigh, NC

Target audience

The educational design of this activity addresses the needs of frontline clinicians: physicians, nurses, nurse practitioners, physician assistants, and pharmacists involved in managing acute and chronic pain.

Current clinical climate

Whether you're in a hospital or office-based practice, chronic pain patients are everywhere—and YOU are absorbing the burden of their care.

Don't run out the back door when a pain patient calls on you—the family practitioner or pain specialist. So many people need your help, and you will get through the current controversies on pain management. Stick with it, learn your licensing board rules and guidelines, and try to follow them. Make your own compliance checklist and really think about what you're documenting. Make sure that you plan ahead and have a valid demonstration of best practices.

— Jennifer Bolen JD—Founder, Legal Side of Pain

The PAINWeekEnd agenda is purposely constructed for the busy clinician, delivering relevant, practical information, together with the opportunity for interaction and exchange with faculty and fellow attendees.

Pain Management for the Main Street
Practitioner has been created to streamline
the clutter of information on assessment,
evolving guidelines, risk management, and
changing reimbursement scenarios. Join us
for clinical, legal, and practice management
CE/CME designed expressly for frontline
clinicians. Participants can receive 6.0 CME/CE
credits as they expand their capabilities in the
assessment, diagnosis, and management of
chronic pain conditions.

PAINWeekEnd Regional Conferences are produced by PAINWeek®—the leading pain education resource for frontline practitioners. Chronic pain is a major public health issue and a challenge that primary care clinicians face every day as they absorb the burden of care for aging baby boomers.

Painweekend.

Pain Management for the Main Street Practitioner

Educational objectives

By participating in PAINWeekEnd, you will be able to:

- Explore the multifactorial issues contributing to the opioid crisis
- Identify primary and secondary pain generators that contribute to neck and upper extremity pain.
- Evaluate treatment safety and efficacy of COX-2 Inhibitors for the management of chronic pain
- Recognize the growing burden of the opioid epidemic and the role of all stakeholders in addressing the opioid epidemic in their community
- Identify the pathophysiology of migraine headache
- Describe how routine examinations may be deficient in providing adequate differential diagnosis of back pain

Faculty

David M. Glick DC, DAAPM, CPE, FASPE CEO & Medical Director
HealthQ2
Richmond, VA

Gary W. Jay MD, FAAPM Clinical Professor University of North Carolina Department of Neurology Chapel Hill, NC

Alexandra McPherson Pharmd, MPH
Palliative Care Clinical Pharmacy Specialist
MedStar Washington Hospital Center
Washington, DC

This activity is provided by Global Education Group

5.0 CME/CE hours will be provided by Global Education Group

1.0 CME/CE hour will be provided by CME Outfitters

Conference slides are available at www.pain.sh/pwe2019s

How Do I Obtain My CE/CME Certificate?

Please look for an email from eval@conexsys.com that will be sent to you 1 week following this PAINWeekEnd program. The email will have your personalized link to complete the online conference evaluation form needed to receive your CE/CME certificate. Upon completion of this form, you will be able to download, print, and save your certificate immediately! Please make sure to check your junk mail folder, as this email may be tagged as spam.
