Webinar

# **Target audience**

The educational design of this activity addresses the needs of frontline clinicians: physicians, nurses, nurse practitioners, physician assistants, and pharmacists involved in managing acute and chronic pain.

#### **Current clinical climate**

Whether you're in a hospital or office-based practice, chronic pain patients are everywhere—and YOU are absorbing the burden of their care.

Don't run out the back door when a pain patient calls on you—the family practitioner or pain specialist. So many people need your help, and you will get through the current controversies on pain management. Stick with it, learn your licensing board rules and guidelines, and try to follow them. Make your own compliance checklist and really think about what you're documenting. Make sure that you plan ahead and have a valid demonstration of best practices.

— **Jennifer Bolen** JD—*Founder*, Legal Side of Pain

The PAINWeek Premiere agenda is purposely constructed for the busy clinician, delivering relevant, practical information, together with the opportunity for interaction and exchange with faculty and fellow attendees.

Pain Management for the Main Street
Practitioner has been created to streamline
the clutter of information on assessment,
evolving guidelines, risk management, and
changing reimbursement scenarios. Join us
for clinical, legal, and practice management
CE/CME designed expressly for frontline
clinicians. Participants can receive 2.0 CME/CE
credits as they expand their capabilities in the
assessment, diagnosis, and management of
chronic pain conditions.

PAINWeekEnd Premiere Webinars are produced by PAINWeek®—the leading pain education resource for frontline practitioners. Chronic pain is a major public health issue and a challenge that primary care clinicians face every day as they absorb the burden of care for aging baby boomers.
